**IN-Z61 – IN-Z65**

Low frequency pulse transmitter

**Main features**
- Applicable for all Elster diaphragm gas meters with pulse output
- Retrofi ttable (on request)
- Assembly without impairment of calibration validity
- Alarm contact (see versions)

**Applications**
Retrofittable pulse transmission from a mechanical index

**Brief information**
The pulsers IN-Z61-INZ65, in conjunction with Elster diaphragm gas meters, are applicable with standard index. Integrated Reed contacts periodically open and close depending on the index progress. In connection with an additional device the consumption data can be used for further data processing.

Operating principle: A pulse magnet in the first moving drum of the index type Z3/Z6 activates a reed switch in the pulse transmitter.

A second reed switch allows the detection of magnetic tampering and interruption of the cable connection. (Not for IN-Z62)

The pulse transmitter can be connected via a sealable standard plug and socket system (only for IN-Z61).

Diaphragm gas meters BK-G1.6 to BK-G100 are equipped with the index Z3/Z6 and pulse magnet and can be retrofitted anytime without breaking the government’s seal.

Diaphragm gas meters BK-G40 to BK-G100 are equipped with the IN-Z61 serial.

The pulse transmitter is fixed to the index with an anchor clip.
IN-Z61 – IN-Z65: Low frequency pulse transmitter

Versions of the pulse transmitter

- IN-Z61
- IN-Z62
- IN-Z63
- IN-Z64

Contacts of the pulse transmitter

- IN-Z61
  - Plug connection:
    - Standard Modular Plug 6/4 according to FCC part 68
- IN-Z62
  - Grommet,
    - Clamp connection via 2 luster terminals in the housing
- IN-Z63
  - Connector assignment
    - Plug connector:
      - Binder male socket series 423
- IN-Z64
  - Connector assignment
    - Plug connector 1:
      - Binder male socket series 423
  - Plug connector 2:
    - Binder male cable connector series 723
- IN-Z65
  - Grommet,
    - with cable

A: Alarm contact, reed switch (normally closed)
I: Totalizing contact, reed switch (normally open)
